

New Law Deems Life Begins At Conception, Church Condemns Zygotes as Transgender Abominations

Vatican- In a landmark decision, multiple nations have unanimously deemed that life shall hence forth be defined as beginning at conception. On the heels of this world changing legislation, came an immediate release from the Vatican condemning Zygotes to be godless abominations of no noticeable sex actively defying defined sex roles as decreed by the Lord. The statement signed by all members of the College of Cardinals went on to outline that Zygotes “through their willful defiance, of ascribing to the two approved sexes established by God, are promoting transgender heresy and blasphemy upon God’s will.” We were unable to reach any zygotes to comment on the church ruling and answer any of the accusations posed to their existence, because they are in fact just a bunch of congregated cells.
